About

I wrote my first line of code in 2014 during my time in school, and since then, I have embarked on a continuous journey in the field.

When I don't code, I read technical books, explore histories of various companies.

I enjoy simplicity, both in software, and in life

Experience

Software Developer, SEB

2022 - 08 →

Participating in shaping the foundation of data architecture and DB structures.

Ensuring optimal storage, retrieval, and integrity of information.

Communicating with stakeholders.

Developing e-signature functionality.

Mostly operating in the areas of ATMs and payments.

Java 17, Spring, Oracle Apex, Rest, PostgreSQL, PL/SQL, Jenkins, Podman, Helm, JUnit, Mockito

Software Developer, SEB

2021 - 11 → 2022 - 08

Contributing to all phases of the development lifecycle.

Writing well designed, testable, efficient code.

Preparing and producing releases of software components.

Developed automated financial document gathering tool.

Java 11, Spring, Camel, Soap, Rest, Progress4GL, JUnit, Mockito

Salesforce Developer, DreamCubator

2021 - 08 → 2021 - 11

Writing efficient code for better selection of data and avoiding N+1 problem.

Developing business management systems.

Incentivising the usage of cleaner coding and design patterns.

Increased team efficiency through the introduction of a shared tooling library.

Apex, SOQL, LWC, Aura

Software Engineering Intern, Exadel

2020 - 09 → 2020 - 12

Designing and developing visitor management system.

Reviewing code to reduce project risks by catching bugs early.

Writing unit and integration tests to eliminate unexpected issues occurring after deployment.

Java 14, Spring, Rest, React, JUnit, Mockito, MongoDB

Software Engineering Intern, Nasdaq

2020 - 06 → 2020 - 09

Participating in Central Securities Depository system development.

Participating in Scrum sprints, stand-ups, retrospectives.

Designing and implementing tasks planned during sprint planning.

Implementing unit and integration tests.
Java 11, Spring, JUnit, Mockito, Teamcity, Docker

Java Developer, LITMILL

Full-time

2019 - 04 → 2019 - 11

Engineering, development and testing of an information processing algorithm to support Airbnb hosts with the feedback process, which improves user experience for guests.

Designing, developing, testing the application.

Gathering and processing users' data.

Java 8, Maven, MySQL

Education

Bachelor of Software Engineering, Vilnius Gediminas Technical University

2016 → 2021

Skills

Java, Spring, Oracle, Docker, PostgreSQL, PHP, Salesforce, React
